DIN EN 12600 - European Standards
The BS EN 12600 standard has been designed as a more up to date test although the performance levels are almost the same. Similarly, the EN 12600 test involves a weight being dropped at three different heights, 190mm, 250mm and 1200mm. This weight will be dropped onto a standardly sized pane of glass, the classifications then depend on at which ...

The comparisons between the classification systems under BS 6206 and BS EN 12600 are shown below. Both BS 6206 and BS EN 12600 use pendulum impact tests with similar drop heights and grades safety glass under one of three impact performance classifications. BS 6206 grades are 'A, B or C' with 'A' being the highest performance grade.

6.7 - 17 Marking of safety glass - NHBC
In accordance with BS EN 12600:2002, impact testing is carried out on glass samples measuring 876mm x 1938mm where an impactor weighing 50kg is released from a pendulum mechanism at 3 different drop heights; Classification 3 has a drop height of 190mm; Classification 2 has a drop height of 450mm; Classification 1 has a drop height of 1200mm
