This line is called the Capital Market Line (CML). The capital allocation line (CAL) is the graph of all possible combinations of the risk-free asset and the risky asset for one investor. The capital market line is the line formed when the risky asset is a market portfolio rather than a single risky asset or portfolio.

2020 CFA Level I Exam: CFA Study Preparation

The General Theory of Capital Allocation. Capital allocation decisions should aim to maximize the company's intrinsic value per share as long as this is done in a legal and ethical way. Capital allocation decisions should be made using the idea of opportunity cost. All possible uses of capital should serve as opportunity cost for every other use, necessitating a comparison among all options in order to pick the optimal course.
