Set in the not-too-distant future, Data Runner is an action-packed thrilling ride. A few giant mega-corporations own nearly everything - including the internet. The only way to transmit sensitive data is to employ runners to carry the data from one location to another.

Data Runner (Data Runner #1) by Sam A. Patel
Data Runner is an interesting and novel prediction of the future of data. The premise that no electronic data is secure on the web sets up a society in which to secure privacy is to physically control storage and transport. From that backdrop the characters are well developed and the story-line is well written.

Data Runner is a battlefield located on Endor. Stray transmissions from both sides of the galactic civil war have been picked up in this region. This is a variation on a traditional capture the flag map. Once both teams have members in the pvp zone, one player will be randomly selected to receive a data packet.

I'm calling it the Data Runner, and it's another F91W mod, this time going the extra mile to make something functional and nice looking. Like the previous mods that you may have seen me do, this is based on the Casio F91W, and that's down to the fact that it's THE standard for an inexpensive digital watch, striking a good balance between price, features, build quality, and worldwide availability.
