Morphology of Red blood cells, etc....doc - Morphology of ...

Red Blood Cell Morphology. Red blood cells (erythrocytes) are biconcave disks with a diameter of 7-8 microns, which is similar to the size of the nucleus of a resting lymphocyte. In normal red blood cells, there is an area of central pallor that measures approximately 1/3 the diameter of the cell. Though reference ranges vary between laboratories and in different age groups, normocytic red blood cells typically have a mean corpuscular volume (MCV) between 80-100 fL.
