World Geography - InfoPlease

Due to the bulge of the earth at the Equator, the peak of Ecuador's Mount Chimborazo (20,700 feet or 6,310 meters) is the point farthest from the center of the Earth. Thus, the mountain claims the title of being the "highest point on Earth" (although Mt. Everest is still the highest point above sea level). Mt. Chimorazo is an extinct volcano and is about one degree south of the Equator.

Discover the World With These Interesting Geography Facts

The map above is a political map of the world centered on Europe and Africa. It shows the location of most of the world's countries and includes their names where space allows. Representing a round earth on a flat map requires some distortion of the geographic features no matter how the map is done.
